The date is October 15, 1954. Thirteen-year-old Elizabeth, who lives in the Toronto suburb of Weston, is a typical grade 8 girl. She has a secret crush on a boy in her class and she thinks Elvis Presley is "dreamy." Elizabeth also has a part-time job babysitting an adorable little grade 2 girl named Suzie, and Suzie's not-so-adorable grade 6 brother, David. Elizabeth's job

is to walk Suzie and David home after school and then stay at their house with them until their mother gets home from work. David resents Elizabeth because he thinks he is too old for a babysitter, and he goes out of his way to make life miserable for her. On this particular evening, however, Elizabeth has more than a badly behaved boy to contend with. It is on this October night that Hurricane Hazel roars down on Toronto, bringing torrential rains that cause extensive flooding. David and Suzie's house is on Raymore Drive, a street that will be practically wiped out by the floodwaters. David and Suzie's parents are unable to reach the house, which means the children's safety on this most deadly of nights is Elizabeth's responsibility. She finds herself increasingly isolated. They are surrounded by rising water. The

electricity goes out. The phone goes dead. Still, Elizabeth is sure they will be safe as long as they remain in the house. But are Elizabeth and the children really as "safe as houses"? Before this terrifying night is over, Elizabeth and David will have to learn to communicate and cooperate if they are to save their own lives and Suzie's. Their survival in the midst of one of Canada's worst disasters will depend upon their resourcefulness, maturity and courage.

As the tragedy of the Grenfell tower fire has slowly revealed a shadowy background of outsourcing, private finance initiatives and a council turning a blind eye to health and safety concerns, many questions need answers. Stuart Hodkinson has those answers. He has worked for the last

decade with residents groups in council regeneration projects across London. As residents have been shifted out of 60s and 70s social housing to make way for higher rent paying newcomers, they have been promised a higher quality of housing. Councils have passed the responsibility for this housing to private consortia who amazingly have been allowed to self-regulate on quality and safety. Residents have been ignored for years on this and only now are we hearing the truth. Stuart will weave together his research on PFIs, regulation and resident action to tell the whole story of how Grenfell happened and how this could easily have happened in multiple locations across the country.

Inheritance tax, once almost

exclusively a tax on the wealthy, is now affecting more and more people in the UK as a result of the exponential rise in property prices. Home-owning families are becoming increasingly concerned about the implications of the tax - in particular when it comes to passing on their property to other family members. Practically written, this book provides guidance and strategies for homeowners to enable them to understand how the tax might affect them and what they can do to minimise liability and reduce stress. It covers a range of issues including: understanding tax loopholes and what they really mean; giving away property while still alive; strategies for married couples, civil marriage partnerships, and joint ownership; trusts and other options and choices.

Welcome to the small town of Westhaven. But don't let size fool you. A lot can happen in a small town.

There can be few everyday financial issues more important than the price of houses. Whether we own one and worry about its value or aspire to own one and are frustrated by their high prices, nobody can avoid the issue. In the UK, while prices have fluctuated during our lifetimes, overall they have risen steadily and sometimes spectacularly. The accepted wisdom is that houses are a safe and excellent investment for the long term. But are they really as good an investment as we believe? Might the future be different from the past? Are houses really so safe? This book looks at house prices over the long term in several countries -- including the UK,

the US, France, Holland, Norway, Germany and Australia -- to find out what has happened to house prices and why. The author illustrates his findings with authoritative data on trends and provides intriguing details including a century-long index of UK house prices, an analysis of the value of the White House and a fascinating four-hundred-year story of houses in Amsterdam. - To what extent are we right to view our houses as an investment as well as a home? - If prices can rise for decades and then fall for more than a whole generation, then what does the future hold? - If prices rise further, will houses become unaffordable for many young people? How will that affect our society? - If they crash, will that endanger our banks once more? - Are politicians, policymakers and regulators prepared

He worked for many years at The Boston Consulting Group as a Director and Senior Vice President and is now active in business, investing and research.

In a globalising world, many mature economies share post-growth characteristics such as low economic growth, low fertility, declining and ageing of the population and increasing social stratification. Japan stands at the forefront of such social change in the East Asian region as well as in the Global North. It is in this

context of 'post-growth society' that housing issues are examined, using the experiences of Japan at the leading edge of social transition in the region. The post-war housing system was developed during the golden age of economy and welfare, when upward social trajectories such as increasing population, high-speed economic growth with rising real incomes, housing construction driven by high demands, increasing rates of home ownership supported by generous government subsidies generated new housing opportunities and accompanying issues. As we have entered the post-growth phase of socio-economic development, however, it requires a re-examination of such structure, policy and debates. This volume explores what roles housing plays in the reorganisation

and reconstruction of economic processes, social policy development, ideology and identity, and intergenerational relations. The volume offers a greater understanding of the characteristics of post-growth society – changing demography, economy and society – in relation to housing. It considers how a definitive shift to the post-growth period has produced new housing issues including risks as well as opportunities. Through analysis of the impact on five different areas: post-crisis economy, urban and regional variations, young adults and housing pathways, fertility and housing, and ageing and housing wealth, the authors use policy and institutions as overarching analytical tools to examine the contemporary housing issues in a post-growth context. It also considers any

relevance from the Japanese experiences in the wider regional and global context. This original book will be of great interest to academics and students as well as policy makers and practitioners internationally in the fields of housing studies, urban studies, social policy, sociology, political economy, comparative analysis, and East Asian Studies.

The titular story revolves around an aging English professor who, mourning the loss of his wife, robs other people's homes of their sentimental knick-knacks. In "Free Ham," a young dropout wins a ham after her house burns down and refuses to accept it. "Has my ham done anything wrong?" she asks when the grocery store manager demands that she claim it. In "Carry Me Home,

Sisters of Saint Joseph," a failed commercial writer moves into the basement of a convent and inadvertently discovers the secrets of the Sisters of Saint Joseph. A girl, hoping to talk her brother out of enlisting in the army, brings Bob Dylan home for Thanksgiving dinner in the quiet, dreamy "North Of." In "The Idea of Marcel," Emily, a conservative, elegant girl, has dinner with the idea of her ex-boyfriend, Marcel. In a night filled with baffling coincidences, including Marcel having dinner with his idea of Emily, she wonders why we tend to be more in love with ideas than with reality. In and out of the rooms of these gritty, whimsical stories roam troubled, funny people struggling to reconcile their circumstances to some kind of American Ideal and failing, over and over.

Melanie Stryder refuses to fade away. The earth has been invaded by a species that take over the minds of their human hosts while leaving their bodies intact, and most of humanity has succumbed. Wanderer, the invading "soul" who has been given Melanie's body, knew about the challenges of living inside a human: the overwhelming emotions, the too vivid memories. But there was one difficulty Wanderer didn't expect: the former tenant of her body refusing to relinquish possession of her mind. Melanie fills Wanderer's thoughts with visions of the man Melanie loves -- Jared, a human who still lives in hiding. Unable to separate herself from her body's desires, Wanderer yearns for a man she's never met. As outside forces make Wanderer and Melanie

For slaves fleeing captivity, the Underground Railroad was the most viable means of escape, and with over three thousand miles of clandestine routes and secret trails, Ohio had the country's most extensive network of safe houses. A great number of these passageways were concentrated throughout the state's east central region, particularly the inland channels of Coshocton, Holmes and Guernsey Counties and the now-famous canal route, a major conduit winding through
