Animal behaviour - Animal behaviour - History and basic concepts: The origins of the scientific study of animal behaviour lie in the works of various European thinkers of the 17th to 19th centuries, such as British naturalists John Ray and Charles Darwin and French naturalist Charles LeRoy. These individuals appreciated the complexity and apparent purposefulness of the actions of animals, and ...

Animal behaviour - History and basic concepts
| Britannica

Horses are social animals that live in herds when in a natural state. They also manifest their emotions very openly and visibly. They tend to be dominant and commonly establish hierarchies, without being violent. Aggressiveness isn't part of their nature and they prefer to flee before fighting.
