Solution We are to define the Mach number of a flow and the meaning for a Mach number of 2. Analysis The Mach number of a flow is defined as the ratio of the speed of flow to the speed of sound in the flowing fluid. A Mach number of 2 indicate a flow speed that is twice the speed of sound in that fluid.

Physics and mathematics concerned with the response of matter that continuously deforms (flows) when subjected to a shear stress. The subject can be divided into fluid statics - the study of fluids at rest, and fluid dynamics - the study of the effect of forces on fluid motion. Fluid flows impact transport and mixing (of materials or
