Psychiatric Nursing Care Plans: Fortinash, Katherine M., Worret, Patricia A. Holoday: Amazon.sg: Books

The most comprehensive psychiatric nursing care planning text available assists students and practitioners in providing effective care in a variety of settings. Clear presentation of information, consistent use of the nursing process, correlation of nursing and medical diagnoses, and prioritization of interventions make this text an invaluable resource. Grounded in the latest classification of the Diagnostic and Statistical Manual of Mental Disorders (DSM-IV-TR) and the most current list of NANDA-approved nursing

diagnoses, this text covers a wide range of disorders, their psychopathology, and appropriate nursing interventions with rationales. Care plans use real clinical situations and include therapeutic and nontherapeutic dialogue examples to familiarize nurses with likely scenarios and equip them with the tools they need to feel confident in any clinical setting. The first chapter, The Nursing Process, effectively describes the central principles of psychiatric nursing practice in detailing the ANA's six-step nursing process along with additional information on therapeutic nurse-client communication skills, client history and assessment tools, NIC and NOC, and more. The six-step nursing process format is maintained throughout to emphasize a practice-oriented, problem-solving approach to psychiatric care. Major psychiatric disorders are reviewed consistently and completely with sections including Etiology, Epidemiology, Assessment and Diagnostic Criteria, Interventions, and Prognosis and Discharge Criteria. With this basis of knowledge, relevant care plans are offered in the second section of each chapter. Care plans based on DSM-IV-TR medical and NANDA nursing diagnoses are logically and consistently organized with Assessment Data, Outcome Criteria, Planning and Implementation, and Evaluation sections. Assessment Data sections include detailed related factors (etiology) and defining characteristics or risk factors as appropriate for the specific diagnosis. Outcome Criteria sections give the reader clear indications of the desired end state. Planning and Implementation sections list specific, relevant, and practical nursing interventions with rationales in a clear, comprehensible two-column format. UNIQUE! Therapeutic and non-therapeutic dialogue examples are presented throughout to promote more effective client communication. Evaluation sections state the role of outcome evaluation as a critical and ongoing step in the nursing process. Client and Family Teaching boxes include Nurse Needs to Know and Teach Client and Family sections covering all aspects of post-treatment instructions for clients and caregivers. DSM-IV-TR boxes list all related DSM-IV-TR diagnoses for quick reference. Helpful appendices contain information and strategies that are timely and useful in the care of clients with mental and emotional disorders including such topics as psychiatric and psychosocial therapies, grief and loss, spirituality, and many more.

The fourth edition of this practical reference presents 48 consistent, comprehensive care plans to assist students and practitioners in providing effective psychiatric nursing care in a variety of settings. It covers a wide range of disorders, their psychopathology, and appropriate nursing interventions.

Accompanying CD-ROM has nursing care plans, a customizable psychosocial assessment tool, and monographs about psychotropic drugs.

This convenient, money-saving package is a must-have for nursing students! It includes Fortinash's Psychiatric Mental Health Nursing, 4th edition text and Virtual Clinical Excursions for Psychiatric Mental Health Nursing.

An outstanding resource for students and practicing nurses, the Ninth Edition of Lippincott's Manual of Psychiatric Nursing Care Plans contains 52 nursing care plans that address the most commonly encountered behaviors in psychiatric-mental health nursing. An excellent tool to introduce students to clinical psychiatric experience, the Manual demonstrates use of the nursing process in psychiatric nursing and gives suggestions for specific interventions—with rationale—to address particular behaviors, giving the student a sound basis on which to build clinical skills. Covering a range of problems and a variety of approaches, the care plans are meant to be adapted and individualized in planning nursing care for each client. The Ninth Edition has been thoroughly updated and includes new information on complementary and alternative medicine and using the internet; as well as new or expanded appendices on psychopharmacology; side effects of medications and related nursing interventions; and schizoid, histrionic, narcissistic, and avoidant personality disorders.

The only book featuring nursing care plans for all core clinical areas, Swearingen's All-In-One Nursing Care Planning Resource, 4th Edition provides 100 care plans with the nursing diagnoses and interventions you need to know to care for patients in all settings. It includes care plans for medical-surgical, maternity/OB, pediatrics, and psychiatric-mental health, so you can use just one book throughout your entire nursing curriculum. This edition includes a new care plan addressing normal labor and birth, a new full-color design, new QSEN safety icons, new quick-reference color tabs, and updates reflecting the latest NANDA-I nursing diagnoses and collaborative problems. Edited by nursing expert Pamela L. Swearingen, this book is known for its clear approach, easy-to-use format, and straightforward rationales. NANDA-I nursing diagnoses are incorporated throughout the text to keep you current with NANDA-I terminology and the latest diagnoses. Color-coded sections for medical-surgical, maternity, pediatric, and psychiatric-mental health nursing care plans make it easier to find information quickly. A consistent format for each care plan allows faster lookup of topics, with headings for Overview/Pathophysiology, Health Care Setting, Assessment, Diagnostic Tests, Nursing Diagnoses, Desired Outcomes, Interventions with Rationales, and Patient-Family Teaching and Discharge Planning. Prioritized nursing diagnoses are listed in order of importance and physiologic patient needs. A two-column format for nursing assessments/interventions and rationales makes it easier to scan information. Detailed rationales for each nursing intervention help you to apply concepts to specific patient situations in clinical practice. Outcome criteria with specific timelines help you to set realistic goals for nursing outcomes and provide quality, cost-effective care. NEW! Care plan for normal labor and birth addresses nursing care for the client experiencing normal labor and delivery. UPDATED content is written by practicing clinicians and covers the latest clinical developments, new pharmacologic treatments, patient safety considerations, and evidence-based practice guidelines. NEW full-color design makes the text more user friendly, and includes NEW color-coded tabs and improved cross-referencing and navigation aids for faster lookup of information. NEW! Leaf icon highlights coverage of complementary and alternative therapies including information on over-the-counter herbal and other therapies and how these can interact with conventional medications.

Focusing on what psychiatric nurses actually do in everyday practice, Psychiatric Mental Health Nursing, 5th Edition, uses a balanced nursing-medical approach to cover all of the most common disorders and treatments. The text's full-color illustrations and straightforward style help you make sense of challenging material. And its strong emphasis on the nursing process, updated DSM-IV-TR diagnostic criteria, interdisciplinary interventions, and the latest mental health practices boost your confidence in managing clients and prepare you for success on the NCLEX® examination. UNIQUE! Balanced nursing-medical approach offers strong baseline coverage of the nursing process and interdisciplinary interventions and focuses on what psychiatric nurses actually do. Complete coverage of the nursing process features the six-step problem-solving method and how to put it into practice. DSM-IV-TR Criteria boxes list categories of mental disorders and the criteria for diagnosing them. Nursing care plans provide care guidelines for each plan and include a brief case study, followed by assessment, diagnosis, goal setting, interventions with rationales, and evaluation. UNIQUE! Clinical Alert boxes address issues critical to the safety or well-being of the client. Case studies depict effective nursing care strategies and promote critical thinking. Research for Evidence-Based Practice boxes discuss the implications of current research studies. Client and Family Teaching Guidelines boxes focus on the issues confronting families when a member suffers from mental illness. UNIQUE! Medication Key Facts boxes highlight the most common psychopharmacologic interventions along with safe and effective use. Nursing Assessment Questions boxes include questions that should be asked in the assessment of a particular disorder. Clinical Symptoms boxes help you apply content to the real world. Additional Treatment Modalities boxes summarize other modalities and interventions used in conjunction with nursing interventions in the treatment of a particular disorder. Chapter summaries conclude each chapter with the most significant ideas to remember. Review questions with answers in the appendix offer immediate reinforcement of chapter content and help you prepare for the NCLEX Examination. Glossary provides concise definitions of key terms. Objectives and key terms emphasize the most important concepts from each chapter.

This psychiatric-mental health undergraduate textbook, based on the theories of Hildegard Peplau and Joyce Travelbee, is the first recent book devoted to interpersonal relations as the foundation for therapeutic practice in psychiatric nursing. It guides the student through the essential phases of self-discovery necessary to integrate interpersonal nursing theory into practice, and provides a historical overview of the profession. The book addresses the most current ISPN and APNA competencies and presents content designed to foster self-growth, and critical thinking and decision-making skills, as well as to implement therapeutic interventions. It offers an overview of theories of mental illness and a detailed discussion of commonly seen psychiatric disorders, and addresses mental health care settings across the lifespan and different populations. Clinical case studies and first-hand accounts vividly describe the realities of living with specific mental illnesses, "What would you do?" questions stimulate discussions, and sample and practice care plans for chronic mental illness facilitate integration of concepts into practice. Evidence-based practice summaries from psychiatric nursing and related research literature are included, and NANDA guidelines are integrated throughout. A new chapter with DSM-V updates is also available. This affordably priced text additionally comes with supplementary materials for both teachers and students, including handy review guides, summaries, drug monographs, and hyperlinks to films and video illustrating content. A test bank and PowerPoint slides are also available for instructors. Key Features: Integrates and applies the Peplau/Travelbee interpersonal relations theories to the four-step Assessment, Planning/Diagnosis, Implementation, and Evaluation (APIE) nursing process Addresses critical thinking, clinical decision making, therapeutic interventions, case management roles, and mental health care settings across the lifespan Features NCLEX preparation questions, vivid clinical scenarios, and evidence-based practice summaries Addresses the most current ISPN and APNA competencies A new chapter with DSM-V updates is available Both student and teacher digital aids, including review guides, summaries, hyperlinks to films and video, and drug monographs are available A test bank and PowerPoint slides are also available for instructors eBook Features (available in all eBook formats): Bidirectional link between Key Terms and their glossary definitions Learning Outcomes at start of chapters link to respective sections in book Hyperlinks to supplementary films and videos Care plans DSM-V update This book is also available as part of a discounted set. To view the Psychiatric-Mental Health Nursing Special A Student Pack, click the link above.

A pocket-sized clinical companion, Manual of Psychiatric Nursing Care Planning, 4th Edition helps you assess psychiatric nursing clients, formulate nursing diagnoses, and design psychiatric nursing care plans. It offers quick and easy access to information on care in a range of settings including the inpatient unit, home care, or community mental health setting. Expert author Elizabeth M. Varcarolis, RN, MA, provides a clinically based focus with the latest guidelines to psychiatric nursing care. Designed to accompany Foundations of Mental Health Nursing, this book is a perfect reference for creating care plans and for clinical use. Current coverage includes the latest diagnoses, assessment and treatment strategies, and psychotropic drug information relevant to nursing care of patients with psychiatric disorders. Clinically based information helps you provide patient care in a range of environments including the inpatient unit, community mental health setting, or home care setting. Coverage of all major disorders includes those commonly encountered in a clinical setting. A consistent format for each care plan includes a nursing diagnosis, etiology, assessment findings/diagnostic cues, outcome criteria, long-term goals, short-term goals, and interventions and rationales. Assessment tools such as tables, charts, and questionnaires are provided in an appendix for quick reference. A Major Psychotropic Interventions and Client and Family Teaching chapter describes the uses and workings of psychotropic agents. The latest diagnostic information includes the DSM-IV-TR taxonomy with diagnostic criteria for mental disorders, to enable accurate assessment and diagnosis of patients. Current psychiatric nursing guidelines are based on ANA's 2007 Psychiatric Mental-Health Nursing: Scope and Standards of Practice. Updated 2009-2011 NANDA-I nursing diagnoses assist with accurate diagnoses by including the latest nursing diagnoses related to psychiatric nursing. Updated drug information includes the latest on medications used with psychiatric patients, for optimal drug therapy.

Varcarolis' Foundations of Psychiatric-Mental Health Nursing, 8th Edition is the most comprehensive RN psychiatric nursing text on the market! Awarded second place in the 2018 AJN Book of the Year Awards in Psychiatric Mental Health Nursing category. User-friendly by design, it simplifies the often-intimidating subject of psychiatric-mental health nursing with a practical, clinical perspective. This edition was revised in conjunction with a readability expert to support clarity and ease of understanding. Chapters follow the nursing process framework and progress from theory to application, preparing your students for clinical practice with real-world examples. New to this edition are full-page illustrated explanations about the neurobiology of disorders and associated medications, criteria from the American Psychiatric Association's Diagnostic and Statistical Manual of Mental Disorders, 5th edition (DSM-5) for major disorders, completely revised Evidence-Based Practice boxes, and a fully rewritten chapter on Dying, Death, and

Grieving to provide students with essential information about difficult topics. Mentor-like writing style reinforces important information and helps in applying textbook content to the clinical setting. Coverage of key topics and emerging nursing trends keep you current with best practices in the field. Considering Culture boxes discuss the importance of person-centered care in providing competent care to diverse populations in various clinical situations. Vignettes with vivid mini-stories prepare you for real-world practice with personal, descriptive characterizations of patients with specific psychiatric disorders. Health Policy Boxes introduce the role you can play in advocating for patients and the profession. Clinical chapters follow the six-step nursing process, providing consistent guidelines for comprehensive assessment and intervention. NEW! Full-page illustrated explanations about the neurobiology of disorders and associated medications. NEW! DSM-5 guidelines from the American Psychiatric Association's Diagnostic and Statistical Manual of Mental Disorders are fully incorporated in the text, and include updated NANDA content. NEW! Completely revised Evidence-Based Practice boxes. NEW! Revised chapter on Dying, Death and Grieving gives you all the vital information you need. NEW! Ten NCLEX-style questions and answers at the end of each chapter.
