Includes Part 1, Number 1 & 2: Books and Pamphlets, Including Serials and Contributions to Periodicals (January - December)

Author and subject index to a selected list of periodicals not included in the Reader's guide.

If you had the chance to change your future, would you take it? Perfect for fans of Neal Shusterman and Jason Reynolds, this powerhouse, mind-bending YA debut follows two teens, a generation apart, whose fates collide across time—and outside of it. Today During arguably the worst week of Esso’s life, an accident knocks him into an incredible world—a place beyond space or time, where he can see glimpses of the past and future. But if what he sees there is true, he might not have much longer to live, unless he can use his new gift to change the course of history. Tomorrow Rhia’s past is filled with questions, none of which she expects a new physics tutor to answer. But Dr. Esso’s not here to help Rhia. He’s here because he needs her help—to unravel a tragedy that happened fifteen years ago. One that holds the key not only to Rhia’s past, but to a future worth fighting for. Soon to be a major Netflix movie starring Oscar winner Daniel Kaluuya! (Get Out, Black Panther, Judas and the Black Messiah)

This document summarizes Scientific Research Associates, Inc., (SRA) low temperature material studies, carried out under U.S. Air Force Office of Scientific Research (AFOSR) Contract F49620-94-C-0024. The study summarizes a model that was developed that is consistent with present low temperature growth (LTG) experimental studies. SRA's study included one-dimensional transient simulations and two-dimensional time independent constrained geometric studies. The broad aspects of the study indicate that annealed LTG GaAs is best represented as material containing precipitates with characteristics of embedded Schottky barriers. These embedded barriers are, in turn surrounded by defects. Carrier transport in annealed LTG GaAs is between the precipitates, with the details determined by the precipitate spacing, the concentration of traps, and properties of the surrounding traps. The two-dimensional studies provide numerical evidence that carriers travel between precipitates and are influenced, to first order, by the properties of the surrounding traps.

Includes entries for maps and atlases.

The College Physics for AP(R) Courses text is designed to engage students in their exploration of physics and help them apply these concepts to the Advanced Placement(R) test. This book is Learning List-approved for AP(R) Physics courses. The text and images in this book are grayscale.
