### ~~Sun~~ The Sun

The sun is an MHD system that is not well understood.

Magnetohydrodynamics (MHD; also magneto-fluid dynamics or hydro-magnetics) is the study of the magnetic properties and behaviour of electrically conducting fluids.

## Magnetohydrodynamics Of

The Sun has been studied with interest for thousands of years. It was born from a contracting, rotating, interstellar cloud that spun up during the collapse. The protostar would have settled down into a state where gravity and a pressure gradient balance one another and
