The companion workbook to the Investment Management volume in the CFA Institute's Portfolio Management in Practice series provides students and professionals with essential practice regarding key concepts in the portfolio management process. Filled with stimulating exercises, this text is designed to help learners explore the multifaceted topic of investment management in a meaningful and productive way. The Investment Management Workbook is structured to further readers' hands-on experience with a variety of learning outcomes, summary overview sections, challenging practice questions, and solutions. Featuring the latest tools and information to help users become confident and knowledgeable investors, this workbook includes sections on professionalism in the industry, fintech, hedge fund strategies, and more. With the workbook, readers will learn to: Form capital market expectations Understand the principles of the asset allocation process Determine comprehensive investment strategies within each asset class Integrate considerations specific to high net worth individuals or institutions into the selection of strategies Execute and evaluate chosen strategies and investment managers Well suited for individuals who learn on their own, this companion resource delivers an example-driven method for practicing the tools and techniques covered in the primary Investment Management volume, incorporating world-class exercises based on actual scenarios faced by finance professionals every day.

In the turbulent marketplace of the New Economy, portfolio managers must expertly control risk for investors who demand better and better returns even from the safest investments. Finance and investing expert Frank Fabozzi leads a team of experts in the discussion of the key issues of fixed income portfolio management in the latest Perspectives title from his best-selling library. Perspectives on Fixed Income Portfolio Management covers topics on the frontiers of fixed income portfolio management with a focus on risk control, volatility framework for the corporate market, risk management for fixed income asset management, and credit derivatives in portfolio management. Other important topics include:
