succeed are also necessary to successfully round out a fully meaningful training program.

COURSE OVERVIEW: In completing this nonresident training course, you will demonstrate a knowledge of the subject matter by correctly answering questions on the following: History and Organization of the Seabees and Laws of War; Special Clothing and Equipment; Service Rifle and Pistol Marksmanship; Combat Maneuvers, Formations, Patrols, and Ambushes; Land Navigation; Evasion, Survival, and Escape; Individual Protective Measures; Entanglements; Chemical, Biological, and Radiological (CBR) Defense; First Aid and Field Sanitation; Grenades, Land Mines, and Booby Traps; Organic Support Weapons: M203 and Machine Guns; and Organic Support Weapons: 60-mm Mortar and AT4. **THE COURSE:** This self-study course is organized into subject matter areas, each containing learning objectives to help you determine what you should learn along with text and illustrations to help you understand the information. The subject matter reflects day-to-day requirements and experiences of personnel in the rating or skill area. It also reflects guidance provided by Enlisted Community Managers (ECMs) and other senior personnel, technical references, instructions, etc., and either the occupational or naval standards, which are listed in the Manual of Navy Enlisted Manpower Personnel Classifications and Occupational Standards, NAVPERS 18068. **THE QUESTIONS:** The questions that appear in this course are designed to help you understand the material in the text. **VALUE:** In completing this course, you will improve your military and professional knowledge. Importantly, it can also help you study for the Navy-wide advancement in rate examination. If you are studying and discover a reference in the text to another publication for further information, look it up. **CONTENTS** □ Volume 1: CHAPTER PAGE 1. History and Organization of the Seabees and Laws of War 1-1 2. Special Clothing and Equipment 2-1 3.

Overview As you advance in your rating, both you and the Navy benefit. This is understandable since you have gained more experience in your rating, have probably attended several Navy schools, and your overall attitude is generally well-oriented to Navy life. You are now better qualified and in a better position to impart your knowledge and experience to the personnel you supervise. Your bearing, actions, and disposition are under scrutiny not only by your seniors, but also by your subordinates. Advancement brings both increased rewards and

increased responsibilities. These include higher pay, greater prestige, more interesting and challenging assignments, and the satisfaction of getting ahead in your chosen career. As a new first class or chief petty officer (CPO), these interesting and challenging assignments bring along new leadership responsibilities. You have acquired a great amount of valuable knowledge and expertise in your career; now it is your turn to pass this technical know-how on to others.

COURSE OVERVIEW: Basic Military Requirements, NAVEDTRA 14325, is a self-study training manual (TRAMAN)/nonresident training course (NRTC) that covers the basic knowledges required of the men and women of the U.S. Navy and Naval Reserve. This TRAMAN/NRTC provides subject matter that directly relates to the naval standards for the apprenticeship (E-2/E-3) rates. The naval standards are found in the Manual of Navy Enlisted Manpower and Personnel Classification and Occupational Standards (Volume 1), NAVPERS 18068F. **THE COURSE:** This self-study course is organized into subject matter areas, each containing learning objectives to help you determine what you should learn along with text and illustrations to help you understand the information. The subject matter reflects day-to-day requirements and experiences of personnel in the rating or skill area. It also reflects guidance provided by Enlisted Community Managers (ECMs) and other senior personnel, technical references, instructions, etc.

Military government on Okinawa from the first stages of planning until the transition toward a civil administration.

This book deals with ship design and in particular with methodologies of the preliminary design of ships. The book is complemented by a basic bibliography and five appendices with useful updated charts for the selection of the main dimensions and other basic characteristics of different types of ships (Appendix A), the determination of hull form from the data of systematic hull form series (Appendix B), the detailed description of the relational method for the preliminary estimation of ship weights (Appendix C), a brief review of the historical evolution of shipbuilding science and technology from the prehistoric era to date (Appendix D) and finally a historical review of regulatory developments of ship's damage stability to date (Appendix E). The book can be used as textbook for ship design courses or as additional reading for university or college students of naval architecture courses and related disciplines; it may also serve as a reference book for naval architects, practicing engineers of related disciplines and ship officers, who like to enter the ship design field systematically or to use practical methodologies for the estimation of ship's main dimensions and of other ship main properties and elements of ship design.
