See what baby animals eat in the third book of this nonfiction series, now in paperback Around the world, baby animals eat to grow big and strong. Whether it's bear cubs snacking on clams, giraffes munching on leaves, or chimpanzee babies drinking milk from their moms, baby animals eating are not only adorable—they can teach us about animal behavior, too. The third book in the Baby Animals series, Baby Animals Eating showcases more than 10 species from around the world eating different things. Stunning, intimate, full-color photographs by Suzi Eszterhas are each paired with a short sentence highlighting information about the animal. Designed both to be read aloud and for young children to explore independently, this book will encourage readers to make connections between themselves and the animals. Back matter gives further information about Suzi Eszterhas and some behind-the-scenes detail.

Baby animals come in many different shapes and sizes, and many of those shapes and sizes are covered in spots or stripes. In Baby Animals Spots & Stripes, each turn of the page reveals a pair of adorable baby animals—one spotted and one striped. On the back cover of the book is a list of the animals featured (mammals, reptiles, birds, and fish). The book closes with a full-color illustration of babies playing with toy versions of each animal. This title is a companion to the best-selling Baby Animals Black and White. The bold black-and-white patterns stimulate eyesight and brain development in infants. The recognition and naming of familiar animals promotes speech development in older babies and infants.
